

GigaKaf Technologies Corporate Profile

Innovation Untrammelled

Company Overview

GigaKaf Technologies is dedicated to providing high quality software developed to meet our client's requirements. We also Engineer websites for our clients as well as provide PC Support. Our Training centre is well equipped with a state of the Art computer laboratory and quality assurance standards that ensure you do not only graduate, but also gives you a competitive advantage in this day and age. Be it IT Training, Web Engineering, PC Support or Software Development; We have it all...

Our Mission

Our mission is to provide innovative ideas and solutions for the Information Technology (IT) and the business world. We aim to be the cream of the crop in providing IT and Business solutions through high quality products and services...

Our Vision

Our Vision to Break the innovation Barriers and go out of our way to providing products and services that exceed our client's expectations...

Our Core Business

Software Engineering

Software custom developed for your organisation that can give you a significant business advantage over your competition.

Web Engineering

With a well engineered site, you are sure to have increased sales, enhance your corporate image, gain competitive advantage over your competitors, create a global presence as well as turning your business to a 24 hours business.

Networking

Creating a network ensures reduced costs since peripherals like printers can be shared between computers, data integrity since files can be centrally managed, security since Network Operating Systems allow for strict control over the level of access granted, and as well as easy backup.

Other Areas of Competence

Other Areas Include PC Support, Data recovery, Graphic Designing, Printing, IT Training, Animation & Video Production.

GigaKaf Technologies Corporate Profile

Our Corporate Advantage

By implementing Cross Platform technologies, our clients can be sure of software that will run in any environment.

Thanks to Object Oriented Technologies and UML Modelling, We are sure of finding solutions even to the most complex task using Modular Programming using our secure and constantly updated classes.

Both our technical and development teams are well informed on different technological advancements. You are assured that we have the answers to your IT needs...
